

Jessi Hargrave

Jessi specialises in risk management through the implementation of efficient business systems. She has experience in environmental, quality and safety management systems aligned with recognised International and Australian standards. Jessi has audited in offices and sites across Australia and into Papua New Guinea.

Jessi has been auditing since 2010 when she started with NCS International. She has also worked for British Standards Institute, Compass Assurance Services and ATLAS Certification Pty Ltd. Jessi has audited and provided consulting services across a diversity of industries including oil and gas, mining, retail, manufacturing, laboratories, telecommunications, port authorities, construction, water authorities, government and facilities management.

Prior to auditing, Jessi worked as an environmental engineer within the oil refining industry. She has experience in ground and surface water management, root cause analysis, legal compliance, industrial monitoring and refinery processes.

Audit Experience

- Resources – nickel mining and processing operations, other base metals mines, mineral sand mines, oil production facilities (PNG), oil refining
- Utilities - gas transmission pipelines, telecommunications
- Water Authorities
- Forestry – contractors and regulators
- Manufacturing – asphalt, furniture and packaging
- Government – commonwealth, state and local
- Facilities Management

Audit Highlights

- Auditing compliance to ISO 14001 in the complex sub-Antarctic environment at Macquarie Island
- Auditing high risk environmental sites in PNG over consecutive years and seeing the improvement in risk management as a result of compliance with ISO 14001
- Internal auditing of high risk processes within ISO 9001 systems for a large WA state government department

Consulting Highlights

- Assisting a large oil and gas client to upgrade their existing systems to ISO 14001:2015, assisting them to comply with the standard requirements and achieve external attestation
- Assisting a hospital facility services provider to achieve ISO 9001 certification, meeting its contractual obligations and achieving large business KPI bonuses
